Binds Water Molecules For
Plump Skin

1 Who is suitable for Plenhyage XL Strong?

Anyone looking to have deep skin repair and renewal, achieve smoother and firmer skin, or reduce the appearance of scars, while generate HA from within.

2 How many treatments are needed?

Typically a course of 3 - 4 sessions is recommended, depending on skin condition.

3 Is the treatment painful?

A numbing cream is usually applied to minimize discomfort. Most patients describe it as tolerable.

4 Are there any side effects?

Mild redness, swelling, or small injection marks may appear but usually subside within 24-48 hours.

5 When can I see results?

Noticeable improvements can be seen within a week, with optimal results after the full course.
